

CAREGIVING EXPERIENCES

*in English-speaking family caregivers of people with dementia
- A survey study -*

- Are you aged 18 years or older?
- Do you come from an English-speaking background?
- Are you currently providing regular care for a family member with dementia?
- Have you been providing care for at least 6 months?

We are studying the caregiving, social experiences, and wellbeing among English-speaking family caregivers of people with dementia in Australia. Eligible participants will complete two surveys, approximately 6 months apart. Each survey will take about 25-40 minutes to complete. Surveys can be completed online, via telephone, in person, or on paper.
